We deliver across the entirety of the United States of America with our fleet of highly trained snails. It is our personal mission to deliver your mail as slowly as possible, using only our sluggish snails. We are so committed to our quality of delivery that we have had one package in the process of delivery for over one hundred and forty years, our first coast to coast delivery.

We specialize in the safe delivery of wedding invitations and legal documents, but we are always open for new packages, regardless of their contents. Packages can be sent out from any of our 50 locations.

Our speed is our mission... Nonexistent

Our company employs over one thousand full time snail trainers, whos jobs are to care for our delivery snails while they are out on missions and when they are back at base, ensuring the slow but consistent delivery that you love.

Over its lifetime, our company has had over eight million snail deliverers, with our longest lineage of snails being as old as the company itself, since 1872. Despite this, we have never stopped hiring new talent for deliveries, with our company on boarding over a thousand snails monthly.
